Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Lines 6 and 7 of claim 1 do not clearly recite a structural limitation to the previously recited first amplifying section. It is suggested that this language be amended to state that the filter is further configured to reflect a portion of the first band optical signal such that it is directed to the first optical path.

Line 2 of claim 5 should be restated: "the portion of the first band optical signal reflected by the filter".

The "fifth wavelength division multiplexing optical coupler" recited by claim 7 is indefinite because there are no previously recited second through fourth couplers.

In claim 9, line 3, the term "reflected" should be inserted before the term "light".

The term "third pumping light" recited by claim 10 is indefinite because there are no previously recited first and second pumping lights.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3663

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by
Srivastava et al (6,049,418).

Srivastava et al disclose a wide-band erbium doped amplifier comprising: a first optical path (C-Band) and a second optical path (L-Band); a first erbium doped fiber (52) in the first path; a gain flattening filter (22) in the first path and a second amplifying fiber (11) in the second optical path.

The structure recited above reads on the limitations of claims 1-14 as presently understood under 35 USC 112.
